

Dear Jason,

thanks for inviting me to the *pdf-objects* show. I like the concept and the collection of different types of texts that it has generated.

My idea for *pdf-objects* is to make this collection physically available in the exhibition.

Instructions:

- print this pdf and stick it to a wall in the exhibition space.
- get a shopping cart from a nearby store.
- place as much print-outs of your *pdf-objects library* in that shopping cart. Visitors can move the cart around, take out the texts and read them or even take them home if they want.
- Return the shopping cart to the store

Success with your growing project!

All my best,

Bernd Trasberger
